

I have been a liscensed Amateur Radio Operator for 47 years. I am very concerned over the Broadband Over Power Lines )BPL), 03-104, situation. I am strongly opposed to any BPL technology due to the interference potential to the Amateur HF and VHF bands.

Over my 47 years of active participation in Amateur Radio, I have seen literally thousands of disaster situations where Amateur Radio was the only means of communication. Hurricanes, floods, even the recent power blackout in the Northeast. You name it, Hams have come to the rescue. Please do not let the economic interests of the large power companies to DESTROY our Amateur Radio bands.

Benton P. Webb, K5HKX
